

2225 N 25th St. Terre Haute, IN 47804 • 812-232-1292 • 1-877-232-1299

### **Opening your Above Ground Pool**

1. Pump water and clean leaves off of winter cover.
2. Remove cover.
3. Move filter valve from “Winter” to “Filter” setting, if you have a sand filter.
4. Make sure all drain caps/plugs are returned to the pump and filter.
5. Re-Attach the filter connection hoses:
  - a. Bottom of the skimmer to the side of the pump
  - b. Top of the pump to the filter valve
  - c. Filter valve to the pool
6. Remove winter plugs from skimmer and outlets
7. Fill the water in the pool to the middle of the skimmer or higher.
8. Put baskets back in the skimmer and the pump. Turn on the pump.
9. Add the necessary opening chemicals and let circulate for 24 hours.
10. Take water sample into Sparkle Pools to have the water tested.

Opening Chemicals: You should use one quart of Sparkle Algaecide 30, one quart of Sparkle Stain and Scale, and four gallons of liquid chlorine.
